For immediate release: June 24, 2020

Press Release
Gallatin County COVID-19 Update

As of Wednesday, June 24, 2020, at 12 p.m. Gallatin County has 2 new confirmed cases of COVID-19, for a cumulative total of 221. There are 28 confirmed active cases. There have been a total of 192 people recovered in Gallatin County. One person has died from COVID-19 complications.

The new cases are located in Gallatin Valley, and are community spread.

More data can be found on Gallatin City-County Health Department's dashboard on our website here. This dashboard will be updated by 12 p.m. daily. Information on statewide cases continue to be found here.

Please note that local data on active cases may differ from the state map as the state map is only updated once daily and calculates active cases differently.

The Gallatin City-County Health Department calculates the **recovered case number** as the number of total cases minus any active cases, current hospitalizations and deaths.

As we reopen, we expect to see new COVID-19 cases. The unknown of community spread can be unsettling, but stay diligent. Wash your hands, sanitize frequently touched surfaces, keep social distance, and #MaskUpMT. This is our #CommUNITY; let's keep this curve flat, together.

The Gallatin City-County Health Department Call Center is open seven days a week from 8 a.m. to 5 p.m. to answer questions about COVID-19. Reach the Call Center by phone at 406-548-0123 or email at callcenter@readygallatin.com.

The most accurate local source of information remains the GCCHD website.
